POLLY TICKS: News and Views

NEW YORK— Speaking on WABC-TV's eyewitness news conference, Mayor Kenneth A. Gibson said he views favors as a political necessity. The mayor also spoke about the realities of running a big city, raises, councilmen, and the mood of the people. Gibson also skirted the questions about his political plans.

Newark presiding Judge Irving Booker signals a new era for the court system, raising the seal of the city before more than 200 people. The four-story brick structure first floor held two new courtrooms, a children's nursery and the basement as a cell block.

Candidate Freeholder of the Second district Pearl Beatty had a block party given by Mr D. Payne at 754 So. 16th Street, folks from blocks around pledged their support to Pearl Beatty.

Kenneth A. Gibson Civic Association drives for Newark Voter Registration, the deadline is Oct. 10th. If you're not a registered voter, please do so at once, suggests Pearl Beatty, candidate for freeholder in the 2nd district, which includes South, Central and lower portion of the West Wards.

Newark Senator Wynona Lipman (D) Essex County will represent the New Jersey State Senate on planning and assisting in the development of a major statewide conference of Library and Information Services.

Political Bits and Pieces— Bill (S-240) sponsored by Sen. Anthony Scordino (D) Bergen County: Defrosters for the rear of all cars by January 1, 1980.

Bill (A710) sponsored by Peter Shapiro (D) Essex County placed in position for a later floor vote by full Senate: Rights for Disabled.

The Assembly by a vote of 69-0 gave final legislation to allow counties to take control of money seized in drug arrests.

The growing need for adequate exposure of existing Black-owned enterprises in the New Jersey-New York area, both to Black and White consumers.

Bridging the "exposure gap" between Black-owned enterprises and big business.

Dealing with one of the severe causes of limited business success among many Black-owned enterprises located in New Jersey & New York.

Creating a unique medium to serve the inner and outer communities through an increasing consumer awareness of broad range of products and services by Black-owned businesses.

Opportunities for widening the market ability of goods and services offered by Black-owned businesses, at a level of exposure unavailable anywhere else at comparable costs.

Providing a continuing service annually to the minority business community; increasing awareness of the values of minority contributions in products and services for the economic growth of our cities.

A meaningful step toward the reality of economic development among minorities.

A greater knowledge, locally and nationally, of the important role which Blacks and other minorities play in the life of our communities, our city and the country as a whole.

Your Community wants to know about you. It's good for them, good for you.

Sickle Cell Treatment Developed

Seattle — (AP) — Persons with sickle cell anemia may live longer with the help of a new machine that treats their blood with a poisonous chemical.

Human testing will begin next year, says a University of Washington researcher who helped build and test one of the devices.

Sickle cell anemia, a blood disease, afflicts as many as 50 million people, most of them black, and kills half its victims before they reach age 20. Those afflicted have red blood cells which form a crescent or sickle shape, lose their ability to move through body capillaries and thus cut off oxygen supplies.

"We're closer now than we've been for years" to a treatment for the disease, said Albert Babb, a biochemical engineer and chairman of nuclear engineering at UW.

The new machine functions like a kidney dialysis device, which was also developed at the University of Washington. Patients' blood would be pumped through the machine and dosed with the chemical sodium cyanate before being returned to the body.

Researchers hope the chemical will prevent the cells from "sickling." Because the chemical is toxic, almost all of it must be removed before the blood is returned to the body, Babb said.

If the treatment works as expected, a patient might undergo machine treatment once every two weeks in a single six-hour session, Babb said.

UNIT PRICING

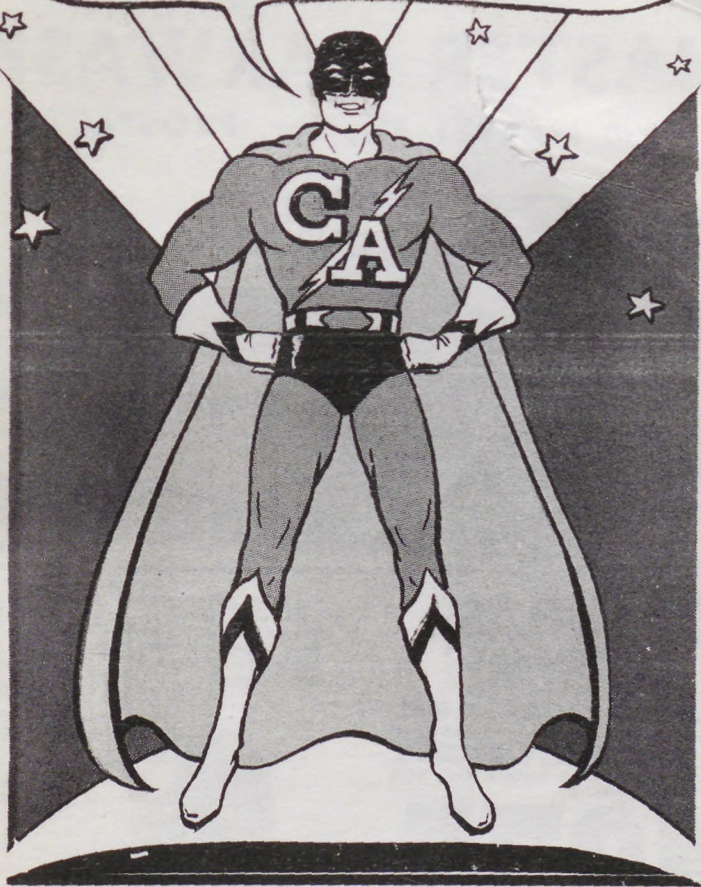

Did you know that unit pricing labels at the supermarket can help the consumer save money by comparing similiar products and different sizes of the same product? Well, it can!

The Newark Office of Consumer Action advises consumers to consider these points when shopping:

1. Unit pricing gives you the price per single unit, such as price per pound or quart.
2. Unit pricing labels appear on the shelf underneath the product or right on the packages of meat and bakery items.
3. Size of the package, brand or product name and the price you'll pay for that particular package all appear on the label.
4. The biggest size package isn't always the best buy. Use the information on the label to compare prices of different size packages.
5. Use of unit-pricing labels may be one of the best ways to extend your buying power.
6. Compare store brands with national brands through the use of unit-pricing labels.
7. Unit pricing can be used to compare different packages on the same product.
(For example, a small box of laundry detergent with the larger "economy size".)
8. Unit pricing can also be used to compare different brands of the same products (for example Brand "A" detergent vs. Brand "B").

Remember, smart shopping can save you money. It only takes a little extra time and effort to get the most value for your money.
